# LITHIUM ION BATTERY SAFE LITE

A FIRE SUPPRESSING & CONTAINING CABINET WITH CHARGING OPTION

## KEY FEATURES

- Secure cabinet designed for safe charging and storing of lithium batteries
- Fire-resistant construction: The cabinets are designed featuring an inner layer of fire insulation material (Euroclass A1) providing resistance to fire from both inside and outside
- Two fire alarm sensors, one inside the cabinet and one outside, which can be placed anywhere in the room
- Integrated electrical sockets with surge protection for charging batteries whilst being stored
- Perforated shelves each with an even load of 50kg
- Ventilation outlet on top of cabinet
- Attractive white appearance (RAL 9010)
- Supplied with 1 power strip as a standard, with 8 UK outlets
- 1 and 5 adjustable, perforated shelves for the counter respective the tall cabinets. Additional shelves are available as an add on.
- Customization possibilities of integrating special cables.
- Additional power strips can be included, maximum one per shelf + one at the bottom. So the standard configuration with 1 shelf for a counter cabinet would allow 2 power strips in total, hence 1 included as a standard and 1 additional.
- Standard lock is a key lock, electronic lock is available upon request.
- Optional (and recommended) connection to the building ventilation system.

### Additional accessories included:

- Inner and outer alarm, where the outer alarm can be placed freely in the room.

## PRODUCT SPECIFICATION

Model	Product Code	External Sizes (mm)			Internal Sizes (mm)			Volume (litres)	Weight (kg)	Shelves
		Height	Width	Depth*	Height	Width	Depth
