# LITHIUM ION BATTERY SAFE PRO

A FIRE SUPPRESSING & CONTAINING CABINET WITH CHARGING OPTION

## KEY FEATURES

- Secure, certified cabinet designed to contain and extinguish lithium battery fires
- Fire-resistant construction (from inside to outside) in accordance with EI 180min type A1 and European Standard for Fire Classification NF EN 13501-2
- Tested and certified fire protection (from outside to inside) to EN 14470-1, 105 minutes fire protection & EN 1363-1, 90 minutes fire protection
- Thermo-expanding seals on doors
- Integrated electrical sockets with surge protection for charging batteries whilst being stored
- Visual and audible fire alarms
- Integrated, automatic fire extinguisher
- Automatic closing doors
- Attractive white appearance (RAL 9010)
- Supplied with 1 power strip as a standard, with 7 UK outlets
- 2 and 4 adjustable, perforated shelves for the counter respective the tall cabinets.
- Additional shelves are available as an add on.
- Additional power strips can be included, maximum one per shelf + one at the bottom.  
So the standard configuration with 4 shelves for a tall cabinet would allow 5 power strips in total, hence 1 included as a standard and 4 additional ones.
- Standard lock is a key lock, electronic lock is available upon request
- Optional (and recommended) connection to the building ventilation system.

- Additional accessories included:
- Automatic fire extinguisher
  - Smoke detector
  - Audible & visible alarm
